## Career Objective

Computer Science undergraduate with a strong foundation in **Data Structures & Algorithms** and **Full Stack Development**, seeking an entry-level **Software Engineer** role to apply problem-solving skills and build reliable applications. Experienced in developing full-stack projects using **React, Spring Boot, PostgreSQL, and Node.js**.

## Technical Skills

**Programming Languages:** C++, Java, Python, C

**Core Computer Science:** Data Structures & Algorithms, Object-Oriented Programming, Debugging

**Web Development:** React, Node.js, JavaScript, HTML, CSS, Responsive Web Design, DOM Manipulation

**Backend & APIs:** Spring Boot, REST APIs, WebSockets, STOMP, JWT

**Databases:** PostgreSQL, MySQL, SQL, JPA/Hibernate

**Tools & Technologies:** Git, GitHub, Maven, Flyway, Visual Studio Code

**Problem Solving:** 450+ problems solved on LeetCode using C++ and Java | [LeetCode Profile](#)

## Projects

**Job Portal & Resume Analyzer** | [Live Demo](#) |  GitHub | *React, Spring Boot, PostgreSQL, JWT*

- Built and deployed a **full-stack job portal** supporting job seekers, recruiters, and administrators with role-based authentication and job management.
- Implemented **JWT-based authentication and authorization** with Spring Security, BCrypt password hashing, and PostgreSQL persistence using JPA/Hibernate.
- Developed **resume upload and analysis functionality** to extract candidate skills and generate job-resume match scores, along with application tracking and recruiter applicant management.
- Deployed the **React frontend on Vercel** and **Spring Boot backend on Render**, using Neon PostgreSQL for production data storage and environment-based configuration.

**SplitWiseX** | [Live Demo](#) |  GitHub | *React, Spring Boot, PostgreSQL, JWT, WebSockets, STOMP*

- Built a **full-stack** expense-splitting platform with **React** and **Spring Boot**, supporting group creation, expense tracking, member management, and settlement planning.
- Implemented **JWT-based authentication** with **BCrypt password hashing** and PostgreSQL persistence using **JPA/Hibernate** and **Flyway database migrations**.
- Developed a **greedy settlement algorithm** to minimize the number of transactions required to settle group balances.
- Implemented **real-time multi-user updates** using **WebSockets/STOMP** while maintaining **REST APIs** as the source of truth for persistent group data.

## Experience

**AlgoSon – GraveAngels** |  [Certificate](#)

*Data Science Intern*

*May 18, 2026 – June 30, 2026*

- Performed **data preprocessing and cleaning** on structured datasets using **Python** to improve data quality and consistency.
- Analyzed datasets to identify patterns and generate insights supporting **data-driven decision-making**.
- Collaborated on **data visualization** and **machine learning** workflows, contributing to documentation and reporting.

## Education

**Bachelor of Engineering – Computer Science**

*Chandigarh University, Mohali, Punjab*

Expected 2028

*CGPA: 8.0*

**Senior Secondary (XII)**

*Govt. Model Sr. Secondary School*

2023 – 2024

*Percentage: 87%*

## Achievements & Certifications

- Solved **450+ problems on LeetCode** using C++ and Java.
- Participated in **Code Relay, Webathon, and Ideathon**.
- Advanced Gen AI and Prompt Engineering
- 5G Network Fundamentals
- Participated in the **University Annual Sports Meet**
