Career Objective

Computer Science student focused on **Full Stack Development** and **Data Structures & Algorithms**, with **450+ LeetCode problems solved** in **C++** and **Java**. Built and deployed a live **Node.js** web application, developing a **React-based** campus platform, and completed a **Data Science internship** using Python. Seeking a **Software Engineer** role to build reliable, scalable products through clean, well-tested code.

Technical Skills

Programming Languages: C++, Java, Python, C

Core Computer Science: Data Structures & Algorithms, Object-Oriented Programming, Debugging

Web Development: React, Node.js, JavaScript, HTML, CSS, Responsive Web Design, DOM Manipulation

Databases: SQL, MySQL

Developer Tools: Git, GitHub, Visual Studio Code (VS Code)

Problem Solving: 450+ problems solved on LeetCode |  [LeetCode Profile](#)

Soft Skills: Communication, Teamwork, Adaptability, Documentation, Time Management, Quick Learner

Projects

CampusOne | *Python, HTML, CSS, JavaScript, React*

Expected Dec 2026

- Developing a campus management platform to streamline communication between students, faculty, and administration.
- Building **responsive, accessible** user interfaces to improve overall user experience across devices.
- Designing scalable, modular components for announcements, events, and student services, following clean code practices.
- Structuring the application for maintainability, enabling straightforward feature additions and debugging.

Web Traffic Analyzer |  [Live Demo](#) |  [GitHub](#) | *HTML, CSS, JavaScript, Node.js*

- Built a web traffic analyzer using HTML, CSS, JavaScript, and Node.js to monitor and visualize website traffic patterns.
- Developed **backend logic with Node.js** to process and serve traffic data efficiently.
- Designed a responsive, user-friendly interface for clear visualization of analytics.
- **Deployed the application live on Vercel**, making it publicly accessible and testable.

Experience

AlgoSon – GraveAngels | [Certificate](#)

Data Science Intern

May 18, 2026 – June 30, 2026

- Performed **data preprocessing and cleaning** on structured datasets using **Python**, improving data quality and consistency for downstream analysis.
- Applied analytical and problem-solving skills to extract meaningful insights from datasets, supporting data-driven decision-making.
- Collaborated with a cross-functional team on **data visualization** and **machine learning** workflows, contributing to shared documentation and reporting.
- Gained hands-on experience with real-world data science projects, strengthening troubleshooting and analytical thinking abilities.

Certifications

- Advanced Gen AI and Prompt Engineering
- 5G Network Fundamentals
- Code Relay | Webathon | Ideathon

Education

Bachelor of Engineering – Computer Science

Chandigarh University, Mohali, Punjab

Expected 2028

CGPA: 8.0

Senior Secondary (XII)

Govt. Model Sr. Secondary School

2023 – 2024

Percentage: 87%

Extra-Curricular Activities

- Participated in multiple hackathons (**Code Relay, Webathon, Ideathon**) and the University Annual Sports Meet, strengthening teamwork, communication, problem-solving, and discipline under time constraints.
