Career Objective

Computer Science undergraduate with a strong foundation in **Data Structures & Algorithms** and **Full Stack Development**, seeking an entry-level **Software Engineer** role to apply problem-solving skills and build reliable applications. Experienced in developing full-stack projects using **React, Spring Boot, PostgreSQL, and Node.js**.

Technical Skills

Programming Languages: C++, **Java**, Python, C
Core Computer Science: Data Structures & Algorithms, **Object-Oriented Programming**, Debugging
Web Development: React, **Node.js**, **JavaScript**, HTML, CSS, Responsive Web Design, DOM Manipulation
Backend & APIs: Spring Boot, **REST APIs**, **WebSockets**, **STOMP**, **JWT**
Databases: PostgreSQL, MySQL, **SQL**, **JPA/Hibernate**, **Redis**
Tools & Technologies: Git, **GitHub**, **Maven**, **Docker**, **Flyway**, Visual Studio Code
Problem Solving: 450+ problems solved on LeetCode using C++ and Java | LeetCode Profile

Projects

Smart Inventory Management System | GitHub | *React, Spring Boot, PostgreSQL, Redis, Docker* Live Demo

- Built and deployed a full-stack inventory platform with **admin/employee RBAC**, product, supplier, category, stock, transaction management, and low-stock/reorder workflows.
- Implemented **concurrency-safe inventory operations**, Redis caching, JWT authentication, PostgreSQL persistence, Docker deployment, and **57 automated backend tests**.

Job Portal & Resume Analyzer | GitHub | *React, Spring Boot, PostgreSQL, JWT* Live Demo

- Built and deployed a full-stack job portal supporting **job seekers, recruiters, and administrators** with role-based authentication, job management, applications, and recruiter workflows.
- Developed **resume upload and skill analysis** with job-resume matching using Spring Security, BCrypt, JPA/Hibernate, PostgreSQL, Vercel, Render, and Neon.

SplitWiseX | GitHub | *React, Spring Boot, PostgreSQL, JWT, WebSockets, STOMP* Live Demo

- Built a full-stack expense-sharing platform supporting **groups, expenses, members, balances, and settlement planning** with React and Spring Boot.
- Implemented a **greedy settlement algorithm** and real-time multi-user synchronization using WebSockets/STOMP with PostgreSQL, JPA/Hibernate, and Flyway.

Experience

Algoson – GraveAngels | Certificate
Data Science Intern *May 18, 2026 – June 30, 2026*

- Performed **data preprocessing, cleaning, and analysis** using Python to improve dataset quality and identify meaningful patterns.
- Contributed to **data visualization and machine learning workflows**, supporting documentation and data-driven reporting.

Education

Bachelor of Engineering – Computer Science Expected 2028
Chandigarh University, Mohali, Punjab *CGPA: 8.0*

Senior Secondary (XII) 2023 – 2024
Govt. Model Sr. Secondary School *Percentage: 87%*

Achievements & Certifications

- Solved **450+ problems on LeetCode** using C++ and Java.
- Participated in **Code Relay, Webathon, and Ideathon**.
- Advanced Gen AI and Prompt Engineering | 5G Network Fundamentals
